FIG. 4

A cross-sectional view of a multi-layered structure 500. The structure consists of a central core 510 and a surrounding layer 512. The core 510 is composed of several layers, including a top layer 502, a middle layer 506, and a bottom layer 508. The middle layer 506 is further divided into sub-layers 522 and 528. The bottom layer 508 is divided into sub-layers 530 and 532. The surrounding layer 512 is composed of a top layer 514 and a bottom layer 516. The top layer 514 is further divided into sub-layers 518 and 520. The bottom layer 516 is divided into sub-layers 524 and 526. The structure 500 is shown in a cross-sectional view, with various layers and sub-layers labeled with reference numerals.

FIG. 1 is a schematic diagram of a substrate 1000. The substrate 1000 has a T-shaped cross-section. The vertical portion of the T is labeled 1002, and the horizontal top flange is labeled 1004.
